4th Advanced Course
Innovative wastewater treatment and mathematical modelling
September 27-30, 2018 – Palermo, Italy
What is about?
During the last years many advances have matured in wastewater treatment both in terms of processes and mathematical modelling approaches. For a new generation of new scientists and engineers entering/working in the wastewater treatment field, the quantity, complexity and diversity of these new developments can be overwhelming. This fourth edition of the Advanced Course on Innovative wastewater treatment and mathematical modelling will provide a comprehensive overview and a discussion platform for recent advances and trends currently under development in the context of wastewater treatment.

Who can/should apply?
This course is aimed at professionals (Master, PhD or equivalent experience) in wastewater treatment and mathematical modelling with a basic working knowledge of the two other disciplines. The course is primarily aimed at those already employed in industry who wish to up-date their theoretical knowledge and practical insight in this field.

Language
English will be the official language and no translation will be available.

Duration and period
Four days, 27 – 30 September 2018

Related Event
The course forms part of 11th International Conference on Urban Drainage modelling which will be held in Palermo (ITALY) 23-26 Sep. 2018.
